Noyes' letter of 4/16/72 I've not read his book and won't soon. There is almost nothing not more worthy of the time. However, I will read it. Graf 4 is marked, "agell as LHO's agent. I simply don t believe it and regard it as close to impossible except for the pre-USSR period. I have no doubt about Nagell's past but I also have no doubt he flipped and at that point became a liability.
